Phytoseiid mites (Acari: Mesostigmata: Phytoseiidae) in some regions of western and north western Iran

Bahman Asali Fayaz and Mohammad Khanjani*

Department of Plant Protection, College of Agriculture, Bu Ali–Sina University, Hamadan, I. R. Iran.

Abstract: Study of phytoseiid mites in some regions of western and north–western Iran were carried out during 2008–2011. In this study, 21 species belonging to the six genera were collected and identified. They were associated with aerial parts, soil and litter under cultivated, uncultivated plants and some phytophagous mites and insects.

Keywords: mite, predator, phytophage, fauna, Iran

Introduction

The members of phytoseiid mites are well known predatory mites in the subclass Acari and already some of them are introduced as biological control agents of some phytophagous mites e. g. two spotted spider mites, eriophyid mites and small insect pests such as thrips and whiteflies (Muma, 1971; Meyerdirk and Coudriet, 1986; Sabelis, 1996; Gerson *et al*., 2003; Nomikou *et al*., 2003; Asali Fayaz *et al*., 2011a). The family Phytoseiidae has worldwide distribution and its members are found from the all seven biogeographic regions: Nearctic, Neotropical, Ethiopian, West Palearctic, East Palearctic, Oriental and Australian (Tixier *et al*., 2008). More than 2280 species were reported (Chant and McMurtry, 2007) and only 75 species were recorded from Iran (Faraji *et al*., 2007, 2008; Ueckermann *et al*., 2009; Jafari *et al*., 2011; Shirdel *et al*., 2008, 2009, Hajizadeh *et al*., 2002, 2010; Daneshvar and Denmark, 1982; Daneshvar, 1980, 1987; Khalil–Manesh, 1973; McMurtry, 1977). In this study, 21 species were collected and identified from some regions of western and northwestern Iran.

Material and Methods

This study was carried out in order to collecting and identifying phytoseiid mites in some regions of western and north–western Iran (Hamedan, Kurdistan, Kermanshah and Ardebil provinces) during 2008–2011. The collected samples were transferred to Acarology laboratory for processing. The mites of the foliage samples were obtained by shaking method and Berlese funnel was used to extract the litters and soil specimens. All specimens were directly mounted on microscopic slides using Hoyer's medium (Walter and Krantz, 2009). All specimens were collected by B. Asali Fayaz. The slides were examined under a Nomarski Olympus BX51 microscope. The classification systems used follows that of Chant and McMurtry (2007) and Denmark (1992). List of hosts, localities and map of distribution of the collected specimens are indicated in Table 1 and Figure 1, respectively. The base of map (Fig. 1) is modified from Google earth software (© 2011 Europe Technologies). All specimens are deposited in the Collection of the Acarology Laboratory, University of Bu–Ali Sina, Hamedan, Iran.

Results

Subfamily Amblyseiinae Muma
Tribe Amblyseiini Muma
Subtribe Amblyseiina
Genus Amblyseius Berlese, 1914
***Amblyseius obtusus* (Koch, 1839)**
***Zercon obtusus* Koch, 1839**

World distribution: Armenia, Azerbaijan, Canada, Czech Republic, England, France, Germany (First time from Germany? in gardens, meadows and bank of stream and pool), Greece, Hungary, Italy, Moldova, Morocco, New Zealand, Norway, Poland, Russia, Spain, Sweden, Turkey, Ukraine, USA, Venezuela (Moraes *et al*., 2004), Iran (Faraji *et al*., 2007) and new record for the collected regions of this survey.

Regional distribution: Australian, Holarctic.

Material examined: Sarabe Gamasiab, 24 ix 2009, 2 (♀♀), soil and litter of alfalfa; Marivan, 19 xi 2009, 1 (♀), soil and litter of apple.

***Amblyseius rademacheri* (Dosse, 1958)**

Typhlodromips rademacheri Dosse, 1958: 44.

World distribution: Armenia, Azerbaijan, China, Denmark, Georgia, Germany (First time, on apple), Hungary, Iran, Italy, Japan, Moldova, Netherlands, Russia, Slovakia, South Korea, Switzerland, Ukraine (Moraes *et al*., 2004) and new record for the collected region of this survey.

Regional distribution: Palearctic, Oriental.

Material examined: Heyran defile, 29 ix 2008, 1 (♀), aerial part of Lady Fern bushes, *Athyrium filix–femina* (L.) Roth (Dryopteridaceae).

Subtribe Proprioseiopsina Chant & McMurtry
***Genus Proprioseiopsis* Muma, 1961**
***Proprioseiopsis messor* (Wainstein, 1960)**

Typhlodromus messor Wainstein, 1960: 688.

World distribution: Algeria, Armenia, Australia, Azerbaijan, France, Gaza Strip, Georgia (First time, on grass), Germany, Greece, Israel, Italy, Morocco, New Zealand, South Africa, Spain, Turkmenistan, Ukraine (Moraes *et al*., 2004), Iran (Faraji *et al*., 2007; Nourbakhsh and Kamali, 1995) and new record for the collected region.

Regional distribution: Palearctic

Material examined: Kabodarahangh vicinity, 24 iv 2010, 2 (♀♀), aerial part of alfalfa, *Medicago sativa* L. (Fabaceae), and 20 iii 2010, 1 (♀), soil and litter of alfalfa, 3 (♀♀) soil and litter of Woodland sage plants, *Salvia nemorosa* L. (Lamiaceae); Joraghan village, 08 viii 2009, 2 (♀♀), soil and litter of alfalfa; Heydareh village, 17 ix 2009, 1 (♀), soil and litter of walnut trees, *Juglans regia* L. (Juglandaceae), and 12 xi 2009, 2 (♀♀), soil and litter of apple; Sarabe Gamasiab region, 28 ix 2009, 11 (♀♀) soil and litter of Plane tree, *Platanus orientalis* L. (Platanaceae), and 18 i 2010, 2 (♀♀), soil and litter under Plane tree, *Platanus orientalis* L. (Platanaceae), and 1 (♀), soil and litter under gum bushes, *Astragalus verus* Olivier (Fabaceae); Campus of agricultural faculty, 21 iv 2010, 1 (♀), aerial part of Corn Buttercup plants, *Ranunculus arvensis* L. (Ranunculaceae); Sanghestan village, 26 iv 2010, 4 (♀♀), aerial part of Red clover, *Trifolium pretense* L. (Fabaceae) and 4 (♀♀), aerial part of Yarrow, *Achillea millefolium* L. (Asteraceae); Yekn Abad village, 05 iv 2010, 1 (♀), aerial part of Wall barley, *Hordeum murinum* L. (Poaceae); Hamedan vicinity, 15 viii 2010, 2 (♀♀), soil under gum bushes, *Astragalus verus* Olivier (Fabaceae); Haji Abad village, 2 (♀♀) aerial part of alfalfa; Heydareh Ghazi Khan village, 3 (♀♀), unknown host (soil); Baneh vicinity, 15 v 2010, 3 (♀♀), soil and litter of Sweet cherry tree, *Prunus avium* L. (Rosaceae); Veinesar region of Ghorveh vicinity, 09 viii 2009, 2 (♀♀) aerial part of alfalfa; Sanandaj vicinity, 09 viii 2009, 1 (♀), aerial part of alfalfa; Karvandan village, 11 viii 2009 and 02 ix 2009, 8 (♀♀), aerial part of alfalfa; Kamyaran vicinity, 07 x 2009, 1 (♀) soil and litter under plum tree, *Prunus cerasifera* Ehrh. (Rosaceae); and 1 (♀), soil and litter of tomato; Karvandan village, 24 x 2009, 3 (♀♀), aerial part of alfalfa; Km 40 Sanandaj–Marivan, 24 x 2009, 1 (♀), soil and litter of alfalfa, *Medicago sativa* L. (Fabaceae), and 2 (♀♀), soil and litter under tomato; Sanandaj vicinity, 07 xi 2009, 2 (♀♀), soil and litter under apricot trees, *Prunus armenica* L. (Rosaceae), and 2 (♀♀), soil and litter under sour cherry, *Prunus cerasus* L. (Rosaceae); Naran region, 13 xi 2009, 1 (♀), aerial part of Horse Mint, *Mentha longifolia* (L.) Huds. (Lamiaceae); and aerial part of alfalfa; Chenu region, 19 xi 2009, 13 (♀♀), aerial part of apple trees, *Mallus domestica* Moller (Rosaceae), infested by Woolly apple aphid, *Eriosoma lanigerum* (Hausmann) (Aphididae) and 25 (♀♀), apple fruit under trees and 2 (♀♀), soil and litter of tomato, *Lycopersicum esculentum* Miller (Solanaceae), and 1 (♀), aerial part of raspberry bushes, *Rubus hyrcanus* Juz. (Rosaceae); Kamyaran vicinity, 02 i 2010, 1 (♀), aerial part of Cherry plum; Dalaho vicinity, 1 (♀) unknown host (soil).

Remarks: This species was observed more than other species which were associated with low-growth plants e. g. herbs and also soil and litter of plants.

***Genus Paragigagnathus* Amitai & Grinberg, 1971**

***Paragigagnathus insuetus* (Livshitz & Kuznetsov, 1972)**

Amblyseius insuetus Livshitz & Kuznetsov, 1972: 27.

World distribution: Greece, Turkmenistan, Ukraine (First time on *Tamarix* sp.) (Moraes *et al*., 2004), Iran (Hajizadeh *et al*., 2010) and new for the collected regions of this survey.

Region distribution: Palearctic.

Material examined: Heyran defile, 06 xii 2008, 1 (♀), aerial part of Salt cedar tree, *Tamarix gallica* L. (Tamaricaceae).

Subfamily Phytoseiinae Berlese

[DOR: 20.1001.1.22519041.2012.1.2.5.8]

Genus *Phytoseius* Ribaga, 1904
***Phytoseius ciliatus* Wainstein, 1975**
Phytoseius (Dubininellus) ciliatus Wainstein, 1975: 921.
World distribution: Russia (First time on unspecified substrate), Iran (Moraes *et al*., 2004) and new for the collected region of this survey.
Region distribution: Palearctic.
Material examined: Fandoghlou forest, 04 xi 2009 and 17 x 2009, 2 (♀♀), aerial part of Hazelnut trees, *Corylus avellanae* L. (Corylaceae).

***Phytoseius plumifer* (Canestrini & Fanzago, 1876)**
Gamasus plumifer Canestrini & Fanzago, 1876: 130.
World distribution: Algeria, Armenia, Azerbaijan, Egypt, France, Georgia, Hungary, Israel, Italy (First time on nettle), Jordan, Kazakhstan, Lebanon, Portugal, Ukraine, USA (Moraes *et al*., 2004), Iran (Faraji *et al*., 2007) and new record for the collected regions of this survey.
Regional distribution: Holoarctic.
Material examined: Sarabe Gamasiab region, 28 ix 2009, 4 (♀♀), aerial part of Yellow goats beard, *Tragopogon major* Jacq (Asteraceae) and 17 x 2010, 1 (♀), aerial part of Chicory, *Cichorium intybus* L. (Asteraceae); Heydareh village, 06 xi 2009, 3 (♀♀), aerial part of apple tree; Hamedan vicinity, 24 vii 2010, 1 (♀), aerial part of Quince trees, *Cydonia oblonga* Mill. (Rosaceae); Sanandaj vicinity, 09 x 2009, 4 (♀♀), aerial part of raspberry bushes, *Rubus hyrcanus* Juz. (Rosaceae); Fandoghlou forest, 05 x 2008, 19 (♀♀), leave of Fig, *Ficus carica* L. (Moraceae), and 05 x 2008, 4 (♀♀), aerial part of Lady Fern bushes, *Athyrium filix–femina* (L.) Roth (Dryopteridaceae), and 05 x 2008, 1 (♀), aerial part of Cypress tree, *Cupressus sempervirens* L. (Cupressaceae) and 05 x 2008, 1 (♀), aerial part of Field Bindweed bushes, *Convolvulus arvensis* L. (Convolvulaceae).

Subfamily Typhlodrominae Wainstein
Tribe Typhlodomini Wainstaein, 1962
Genus *Typhlodromus* Scheuten, 1857
Typhlodromus* (*Anthoseius*) *bagdasarjani
Typhlodromus bagdasarjani Wainstein & Arutunjan, 1967: 1765.
Amblydromella (*Aphanoseia*) *bagdasarjani* Denmark & Welbourn (2002)
World distribution: Armenia (First time on fruit tree), Azerbaijan, Turkmenistan (Moraes *et al*., 2004), Iran (Faraji *et al*., 2007; Asali Fayaz *et al*., 2011a) and new record for the collected regions of this survey.
Regional distribution: Palearctic.
Material examined: Faculty of Agriculture, 25 x 2008 and 10 xi 2009, 2 (♀♀), aerial part of Cypress tree, *Cupressus sempervirens* L. (Cupressaceae), infested by *Cenopalpus pulcher* (Canestrini and Fanzago, 1876) (Tenuipalpidae) and also 10 xi,14 x 2009, 3 (♀♀), aerial part of Plane tree, *Platanus orientalis* L. (Platanaceae), and 24 ix 2009, 1 (♀), aerial part of apple infested by *Bryobia rubrioculus* (Scheuten) (Tetranychidae); Heydareh village, 09 ix 2009, 1 (♀), aerial part of apple; Ghorveh Dar Jazin region, [20–23 x 2009, 12 (♀♀), aerial part of grape, *Vitis vinifera* L.: Vitaceae, 23 x 2009, 1 (♀), aerial part of apple]; Malham Abad village, 19 iii 2011, 3 (♀♀), aerial part of plum infested by scale, *Tecaspis asiatica* Balachowsky (Diaspididae); Sanandaj vicinity, 09 x 2009, 2 (♀♀), aerial part of apple and 1 (♀), aerial part of sour cherry, *Prunus cerasus* L. (Rosaceae), and 1 (♀), aerial part of eggplant, *Solanum melongena* L. (Solanaceae), and 1 (♀), aerial part of Peach tree, *Prunus persica* (L.) Batsch (Rosaceae); Chenu region, 18 x 2009, 1 (♀), aerial part of Sweet cherry tree; 09 xi 2009, 2 (♀♀), aerial part of apple; Sanandaj vicinity, 14 xi 2009, 3 (♀♀), aerial part of apple.

***Typhlodromus* (*Anthoseius*) *khosrovensis* (Arutunjan, 1971)**
Amblydromella khosrovensis Moraes *et al*., (1986)
Typhlodromus khosrovensis Arutunjan, 1971: 306.
World distribution: Armenia (First time on *Betula* sp.) (Moraes *et al*., 2004), Iran (Ueckermann *et al*., 2009; Jafari *et al*., 2011; Asali Fayaz *et al*., 2011a) and new record for the collected regions of this survey.

[DOR: 20.1001.1.22519041.2012.1.2.5.8]

Regional distribution: Palearctic.
Material examined: Faculty of Agriculture, [08 x 2008, 1 (♀), aerial part of Plane tree, *Platanus orientalis* L. (Platanaceae), 28 x 2008, 1 (♀), aerial part of apple and 01 viii 2010, 12 (♀♀), aerial part of plum infested by Brown mite, *Bryobia rubrioculus* (Scheuten) (Tetranychidae)]; Heydareh village, 06 xi 2009, 2 (♀♀), aerial part of apple tree infested by TSSM and 1 (♀), aerial part of Peach tree, *Prunus persica* (L.) Batsch (Rosaceae).

***Typhlodromus* (*Anthoseius*) *rhenanus* (Oudemans, 1905)**
Amblydromella (Aphanoseia) rhenana (Denmark and Welbourn (2002)
Seiulus rhenanus Oudemans, 1905: 78.
World distribution: Algeria, Azerbaijan, Belgium, Byelorussia, Canada, Cyprus, Denmark, England, Finland, France, Germany (First time on rotting leaves), Hungary, India, Iran, Israel, Italy, Kazakhstan, Madeira Island, Moldova, Montenegro, Netherlands, Northern Ireland, Norway, Poland, Portugal, Russia, Sweden, Switzerland, Turkey, Ukraine, USA (Moraes *et al*., 2004) and new record for the collected regions of this survey.
Region distribution: Holoarctic, Oriental.
Material examined: Heyran region, 28 ix 2008, 2 (♀♀), aerial part of Lady Fern bushes, *Athyrium filix–femina* (L.) Roth (Dryopteridaceae.)

***Typhlodromus* (*Anthoseius*) *rodriguezi* (Denmark & Daneshvar, 1982)**
Amblydromella rodriguezi Denmark & Daneshvar, 1982: 11.
World distribution: Iran (First time on *Malus* sp.)
Region distribution: Palearctic.
Material examined: Faculty of Agriculture, 17 x 2008, 1 (♀), unknown host.

***Typhlodromus* (*Anthoseius*) *tamaricis* (Kolodochka, 1982)**
Anthoseius (*Amblydromellus*) *tamaricis* Kolodochka, 1982: 11.
Amblydromella (*Aphanoseia*) *tamaricis* Denmark & Welbourn, 2002
World distribution: Turkmenistan (First time on *Tamarix* sp.) (Moraes *et al*., 2004), Turkey (Kasap and Çobanoğlu, 2009).
Regional distribution: Palearctic.
Material examined: Heyran region, 28 ix 2008, 2 (♀♀), aerial part of Salt cedar tree.

***Typhlodromus* Scheuten, 1857**
Typhlodromus (Typhlodromus) athiasae (Porath & Swirski, 1965)
Typhlodromus athiasae Porath & Swirski, 1965: 60.
World distribution: Azerbaijan, Egypt, Greece, Iran, Israel (First time on *Citrus* sp.), Jordan, Turkey (Moraes *et al*., 2004) and new record for the collected regions of this survey.
Regional Distribution: Palearctic.
Material examined: Heyran region, 28 ix 2008, 6 (♀♀), aerial part of Cypress tree *Cupressus sempervirens* L. (Cupressaceae).

Typhlodromus* (*Typhlodromus*) *leptodactylus
Typhlodromus leptodactylus Wainstein, 1961: 153.
Typhlodromus (*Oudemanus*) *leptodactylus* (Denmark, 1992)
World distribution: Armenia, Azerbaijan, Georgia (First time on *Juniperus* sp.), Israel, Ukraine (Moraes *et al*., 2004), Iran (Faraji *et al*., 2007) and new record for the collected regions of this survey.
Regional distribution: Palearctic.
Material examined: Heyran region, 26 xii 2008, 2 (♀♀) aerial part of Cypress tree, *Cupressus sempervirens* L. (Cupressaceae).

***Typhlodromus* (*Typhlodromus*) *tubifer* (Wainstein, 1961)**
Typhlodromus tubifer Wainstein, 1961: 157.
World distribution: Armenia, Azerbaijan, Belgium, Caucasus Region, Georgia (unspecified substrate), Iran, Moldova, Turkey (Moraes *et al*., 2004) and new record for the collected regions of this survey.
Regional distribution: Palearctic.

[DOR: 20.1001.1.22519041.2012.1.2.5.8]

Material examined: Fandoghlou forest, 20 v 2009, 1 (♀), aerial part of Hazelnut tree, *Corylus avellanae* L. (Corylaceae).

Acknowledgment

This paper is a part of M. Sc. thesis of the senior author which was financially supported by Vice Research of Bu–Ali Sina University, Hamedan, Iran. Also, we wish to thank Prof. H. A. Denmark (Emeritus Chief of Entomology, Entomology Bureau, division of Plant Industry, Florida Department of Agriculture x and Consumer services, P. O. Box 147100, Gainsville, Florida 32614-7100, U.S.A) for critical review of the manuscript and also we would like appreciate Prof. Edward A. Ueckermann (ARC-Plant Protection Research Institute, Private Bag X134, Queenswood, Pretoria, 0121 South Africa and School of Environmental Sciences and Development, North–West University, Potchefstroom Campus 2520, South Africa) for supplying some literatures.

کنه‌های فیتوزییده (Acari: Mesostigmata: Phytoseiidae) در برخی از مناطق غربی و شمال غربی ایران

بهمن عسلی فیاض و محمد خانجانی*

گروه گیاه‌پزشکی، دانشکده کشاورزی، دانشگاه بوعلی سینا، همدان، ایران.
* پست الکترونیکی مسئول مکاتبه: mkhanjani@gmail.com

چکیده: مطالعه کنه‌های فیتوزئیده در برخی از مناطق غربی و شمال غربی ایران در طی سالهای ۱۳۹۰-۱۳۸۷ صورت گرفت. در این مطالعه، ۲۱ گونه در قالب شش جنس مرتبط با قسمت‌های هوایی، خاک زیر گیاهان زراعی و غیر زراعی و برخی از کنه‌ها و حشرات گیاهخوار جمع‌آوری و شناسایی شد.

واژگان کلیدی: کنه، شکارگر، گیاه‌خوار، فون، ایران.
